

Paladin Data Systems Launches New Corporate and Software Products Websites

New corporate and product websites feature responsive web design with a clean, uncluttered design, improved functionality and enhanced rich content focused on the company and its software offerings

Poulsbo, WA (PRWEB) February 11, 2014

Paladin Data Systems, which develops a suite of cloud-based software products serving a wide-range of government agencies in all 50 states and 6 territories, announced today the launch of its newly revamped corporate website and three major product sites. The newly redesigned websites offer quick and easy access to essential information and features that offers a more comprehensive understanding of the company's innovative, SaaS-based software products.

The new websites feature responsive web design with a clean, uncluttered design, improved functionality and enhanced rich content focused on the company and its software offerings. The new websites will be updated on a regular basis with news of product software launches, new clients, events, informational webinars, and corporate milestones. Visitors are encouraged to explore the new websites and sign up for direct emails from the company at: <http://www.paladindata.com>.

"Paladin has a compelling story to tell about our cloud based offerings and exciting relationships with IBM, Microsoft and Amazon. Paladin's new website will help communicate this incredible story to our customers, investors, and potential new employees," said Jim Nall, Paladin Data Systems CEO.

A summary of each of Paladin's software product solutions can be found below. For more information visit each respective product website.

About ASMi

The Advanced Skills Management Industrial (ASMi) system is a Web-centric training, testing, and workforce personnel readiness tool designed specifically to manage, maintain and forecast the knowledge, skills and abilities of your workforce. With the need for organizations to maintain their workforce at the highest state of readiness ASMi enables supervisors to assess the overall readiness of their organization , view training capabilities, and provide competency information while forecasting potential readiness shortfalls. In today's austere financial environment keeping personnel readiness at the forefront will ensure your organizations success and readiness in the future. Visit the ASMi product site at: <http://asmsystem.com>.

About Panoramic

Panoramic is designed for Program Managers who need to plan, track, evaluate, and share information about their program. Panoramic is a web-based system helping organizations communicate the purpose, activities, locations, and accomplishments of their programs. Panoramic provides spatial integration, cross-organization collaboration, performance reporting can be specifically tailored to nearly any program. Visit the Panoramic product site at: <http://paladinpanoramic.com>.

About SMARTGov

SMARTGov is a Web-based, software application developed by Paladin Data Systems to support community development functions including permitting, planning, inspections, code enforcement, licenses, fees, parcels, contractors and many others. SMARTGov is customizable, flexible, and interactive. It alerts you of problems, manages workflow, and prioritizes your projects. It can run on your servers or in the cloud as a service, and gives both your citizens and staff access to project data on the web 24/7.
